

## Fully designed and engineered controller panel systems

For more than 27 years, OEM Controls, Inc. has offered one of the most advanced product services of its kind for the mobile/industrial equipment market. A fully dedicated systems engineering team takes each system from inception through production—including conceptualization and design, component search, and the manufacturing process. The durability and toughness that is designed and built into these systems is a result of a real understanding of the harsh environmental conditions and abuse that machines may encounter in the field. Complete turnkey panel systems draw upon our full product line of joystick controllers making OEM Controls a virtual "one stop shop" for controller systems. Our 2-wire/fiber optic multiplex systems and the "smart" **SUPERFLEX** system can be coupled with any controller panel to create a complete controller system. Years of experience have allowed us to put our expertise to work—providing our customers with the consistency, quality, and durability that they have come to expect from OEM Controls.

# COMPLETE CONTROLLER SYSTEMS

**WARNING:** IT IS THE PURCHASER'S RESPONSIBILITY TO DETERMINE THE SUITABILITY OF ANY OEM CONTROLS PRODUCT FOR AN INTENDED APPLICATION, AND TO INSURE THAT IT IS INSTALLED AND GUARDED IN ACCORDANCE WITH ALL FEDERAL, STATE, LOCAL AND PRIVATE SAFETY AND HEALTH REGULATIONS, CODES AND STANDARDS.

Due to the unlimited variety of machines, vehicles and equipment on which our products are used, and the numerous standards which are frequently the subject of varying interpretation, it is impossible for OEM Controls personnel to provide expert advice regarding the suitability of a given product for a specific application. The flexibility of our products allows us to offer thousands of custom configurations. We can advise you of the various features that are available and you can examine models to see what meets your needs. We believe our customer's engineering departments should be the qualified experts in their own product field. If the product will be used in a safety critical application, the customer must undertake appropriate testing to prevent injury to the ultimate user.

SHOULD YOU HAVE ANY QUESTIONS OR IF ANY OF THE ABOVE WARNING IS UNCLEAR, PLEASE CONTACT OEM CONTROLS, INC., 10 CONTROLS DRIVE, SHELTON, CT 06484, (203) 929-8431.
